System and Unit Test Report

Product: SlugMarket
Team: Slug Marketers
June 23, 2018

Scenario 1: New user to app

A. User story from Sprint 1: As a user, I want to create an account with my email so I can access the marketplace
B. User story from Sprint 2: As a user, I want to be able to post an item on the marketplace so I can make sell that item.

Scenario:

1. Start SlugMarket, press Sign Up button, enter information:
   - email = <sammytheslug@ucsc.edu>
   - password = <Password1234>
   - phone number = <+123456789>
   - name = <Sammy>
   - Press next
   - User receives a confirmation code via email and enters it
   - Taken back to login screen

2. User can now log in

3. User can post an item by navigating to the his/her profile and clicking the "Add Item" button
   - item name = <Desk>
   - price = <$50>
   - category = <Furniture>
   - description = <Lightly used desk, need to get rid of. Pick up only>
   - User presses save item

4. The item is now posted on the marketplace with the appropriate category

Scenario 2: User wants to browse marketplace

    A. User story from Sprint 2: As a user, I would like to be able to browse the marketplace by category to make looking for items easier

    B. User story from Sprint 3: As a user, I would like to browse items by recently added to see if I want to buy anything on the marketplace

    C. User story from Sprint 3: As a user, I would like to be able to view other peoples' listings

Scenario:

1. The user opens the app to browse for items
2. The user logs in with their email and password
3. They are greeted by the "Explore" page
4. On the explore page, they can browse recently posted items
5. By clicking one of the categories at the top of the page, they can browse recently posted items in that category
6. By clicking on an item posting, the user can see more details about that posting, like the description and the seller

Scenario 3: User wants to contact a seller

    A. User story from Sprint 2: As a buyer, I would like to be able to contact a seller about purchasing an item

    B. User story from Sprint 1: As a seller, I would like to be able to list contact information to facilitate contact between potential buyers

Scenario:

1. The user sees an item posting that they are interested in
2. The user taps the post and goes to "Seller Details"
3. In the "Seller Details", the user sees the name, phone number, and email of the seller
4. The user can now contact the seller of the item via either email or phone number
